OpenAI Research Division
San Francisco, CA, USA

Sub:

Dear Sir/Madam,

I, Samiul Alam, would like to apply for the position of an AI Research Scientist which was advertised on your company's official careers page dated 25 August, 2025.

I have completed my [B.Sc](#) in CSE from East West University In 2029 and completed my [M.Sc](#) from <university name> in <year>. I am enthusiastically applying for this position because I firmly believe that a combination of my academic background, strong programming expertise, and passion for artificial intelligence research make me an ideal candidate for this role. I possess deep knowledge of machine learning, neural networks, and natural language processing, along with practical experience in implementing large-scale models and publishing research. In my recent work as a Graduate Research Assistant at University of Edinburgh, I contributed to projects focusing on reinforcement learning optimization and efficient deep learning architectures.

In addition, I have hands-on experience with frameworks such as TensorFlow and PyTorch, as well as strong skills in programming languages including Python, C, and C++. I have also collaborated in research teams that required high levels of problem-solving, critical thinking, and innovative experimentation. My contributions have included co-authoring publications, developing research prototypes, and conducting performance evaluations of AI systems.

I consistently believe in taking challenges and exploring new, creative approaches to advance the field of AI. Beyond research, I have mentored junior students and worked in collaborative environments that demanded adaptability, communication, and leadership. Both my academic and research experiences have prepared me to thrive in a dynamic and cutting-edge research environment.

I would be grateful if you kindly give me an opportunity to work at your reputed organization as an AI Research Scientist and oblige thereby.

Thanking you,
Yours Sincerely,
MD. Samiul Alam

Samiul Sami
